Inquiring about digital use and usability of minority languages: the approach of the Digital Language Diversity Project

Claudia Soria, CNR-ILC, Italy
Cor van der Meer, Fryske Akademy, the Netherlands

Little knowledge about digital use and usability of minority languages

Independent surveys

Lack of official data

Digital Capacity

Opportunities for digital use

Desire for digital use

4 Reports on *Digital Language Diversity in Europe*.

Format is reusable and customisable.

Much needed information for digital language planning.

Results deposited in ILC4CLARIN repository.

Format licensed under CC-BY 4.0.

Should be enforced at the national and European levels.

## Main results about digital use and usability of minority languages

Strong desire to use languages digitally, in all sociolinguistic domains and for all the purposes where major languages are used

There is a clear demand for increased regional language usage in the public domain

Speakers need support and encouragement re. ability to use languages digitally and their importance as digital content creators

Lack of structural support for minority languages is a serious issue

Digital development is not sustainable if relying only on activists' and volunteers' work

Action Plan

ENLARGE

COOPERATE

UPDATE

FIND

The number of languages addressed

With interested stakeholders and institutions

And adapt format and content

Sustainable way of carrying out surveys for all EU minority languages
